

12-Inch Black & White Monitor

Installation and Operating Instructions

AMM12
AMM12X

ADEMCO
VIDEO

All information was correct at the time of publication. ADECMCO Video reserves the right to make changes and improvements to the product without notice.

WARNING:

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH VENTILATION GRILLS.

Explanation of Graphic Symbols

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

Safety Precautions

Should any liquid or solid object fall into the cabinet, unplug the unit and have it checked by qualified personnel before operating it any further.

Unplug the unit from the wall outlet if it is not going to be used for several days or more. To disconnect the cord, pull it out by the plug. Never pull the cord itself.

Allow adequate air circulation to prevent internal heat build-up. Do not place the unit on soft surfaces (rugs, carpets, sofas, etc.) or near materials (curtains, draperies) that may block the ventilation holes.

Height and vertical linearity controls located on the rear panel are for special adjustments by qualified personnel only.

IMPORTANT SAFEGUARDS

1. **READ INSTRUCTIONS** – Read the safety and operating instructions before operating the monitor.
2. **RETAIN INSTRUCTIONS** – Retain the safety and operating instructions for future reference.
3. **CLEANING** – Unplug video monitor from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. **ATTACHMENTS** – Do not use attachments not approved by the video monitor manufacturer as they may result in the risk of fire, electric shock or injury.
5. **WATER AND MOISTURE** – Do not use video monitor near water; for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool.
6. **ACCESSORIES** – Do not place video monitor or equipment on an unstable cart, stand or table. The video monitor or equipment may fall, causing serious injury and serious damage to the equipment. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

7. **CARTS** – Video monitor and cart combinations should be moved with care. Quick stops, excessive force and uneven surfaces may cause the equipment and cart combination to overturn.
8. **VENTILATION** – Slots and openings in the cabinet and the back or bottom are provided for ventilation, to ensure reliable operation of the video monitor and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the video monitor on a bed, sofa, rug or other similar surface. Video monitor should never be placed near or over a radiator or heat register. Video monitor should not be placed in a built-in installation such as a bookcase unless proper ventilation is provided.
9. **POWER SOURCES** – Video monitor should be operated only from the type of power source indicated on the marking label. If you are not certain of the type of power supply you have, consult your video monitor dealer or local power company.
10. **GROUNDING OR POLARIZATION** – This video monitor may be equipped with a polarized alternating-current line plug (a plug with one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug. If your video monitor is equipped with a three-wire grounding-type plug (a plug having a third grounding pin), this plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.

- 11. POWER CORDS** – Do not allow anything to rest on the power cord. Do not locate video monitor or equipment where the cord can be damaged by persons walking on it.
- 12. HEED WARNINGS** – Follow all instructions marked on the video monitor.
- 13. LIGHTNING** – During lightning storms or when the monitor will be left unattended and unused for long periods, unplug the monitor and associated equipment from the wall outlet. This will prevent damage to the video equipment caused by lightning and power-line surges.
- 14. OVERLOADING** – Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.
- 15. OBJECT AND LIQUID ENTRY** – Never push objects of any kind into video monitor through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
- 16. SERVICING** – Do not attempt to service video monitor as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
- 17. DAMAGE REQUIRING SERVICE** – Unplug video monitor and equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:
- A. When the power-supply cord or the plug has been damaged.
 - B. If liquid has spilled, or objects have fallen into the monitor.
 - C. If the monitor has been exposed to rain or water.
 - D. If the monitor does not operate normally when following the operating instructions, adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the monitor to its normal operation.
 - E. If the monitor has been dropped or the cabinet damaged.
 - F. When the monitor exhibits a distinct change in performance, this indicates a need for service.
- 18. REPLACEMENT PARTS** – When replacement parts are required, be sure the service technician uses replacement parts specified by the manufacturer or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.
- 19. SAFETY CHECK** – Upon completion of any service or repairs to the monitor, ask the service technician to perform safety checks to determine that the video product is in proper operating condition.
- 20. FIELD INSTALLATION** – Installation should be performed by a qualified service person and should conform to all local codes.

FCC COMPLIANCE STATEMENT

INFORMATION TO THE USER: THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS B DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE IN A RESIDENTIAL INSTALLATION. THIS EQUIPMENT GENERATES, USES AND CAN RADIATE RADIO FREQUENCY ENERGY AND, IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTIONS, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. HOWEVER, THERE IS NO GUARANTEE THAT INTERFERENCE WILL NOT OCCUR IN A PARTICULAR INSTALLATION. IF THIS EQUIPMENT DOES CAUSE HARMFUL INTERFERENCE TO RADIO OR TELEVISION RECEPTION, WHICH CAN BE DETERMINED BY TURNING THE EQUIPMENT OFF AND ON, THE USER IS ENCOURAGED TO TRY TO CORRECT THE INTERFERENCE BY ONE OR MORE OF THE FOLLOWING MEASURES:

- REORIENT OR RELOCATE THE RECEIVING ANTENNA
- INCREASE THE SEPARATION BETWEEN THE EQUIPMENT AND RECEIVER
- CONNECT THE EQUIPMENT TO AN OUTLET ON A CIRCUIT DIFFERENT FROM THAT TO WHICH THE RECEIVER IS CONNECTED
- CONSULT THE DEALER OR AN EXPERIENCED RADIO/TV TECHNICIAN FOR HELP

CAUTION: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE MANUFACTURER COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

THIS CLASS B DIGITAL APPARATUS COMPLIES WITH CANADIAN ICES-003.

CET APPAREIL NUMÉRIQUE DE LA CLASSE B EST CONFORME À LA NORME NMB-003 DU CANADA.

THIS PRODUCT COMPLIES WITH VARIOUS OTHER REGIONAL AND SAFETY REGULATIONS SUCH AS: UL, CUL, CSA, CE. THESE CERTIFICATIONS ARE NOTED ON THE PRODUCT LABEL.

Chapter 1 – Introduction

Figure 1 – Typical configuration

Features

- Use as a closed circuit television monitor or a video preview/playback monitor
- Provides both EIA and CCIR standards
- 75-ohm BNC video input connector
- 75-ohm BNC loop-through connection
- 75-ohm loop-through connection automatically terminates when not connected
- Electronic circuits provide safeguards against interference, noise and changing signal strength to maintain a clear and stable picture.

Technical Overview

The ADEMCO AMM12 is a 12-inch B&W monitor with more than 800 TV lines of resolution at the center. The monitor can easily be switched between the EIA and CCIR standards. It has a 75-ohm BNC loop-through connector so that additional monitors or other video equipment can be “daisy-chained” with the monitor.

Chapter 2 – Installation

Figure 2 – Front panel controls

Figure 3 – Rear panel connectors and controls

Required Installation Tools

Installing the AMM12 monitor does not require any special tools.

Installation Instructions

WARNING: The monitor should be installed in an area that is clean, dry and well ventilated. Do NOT install the monitor where it can get wet; such as near pools, sinks, open windows, etc. Do NOT install the monitor in excessively dusty areas; dust can block ventilation holes causing the monitor to overheat. Operate the monitor on flat firm surfaces; NOT on surfaces such as rugs, carpet, beds or sofas because these can block ventilation holes on the bottom of the monitor. Do NOT install the monitor where items such as drapes or curtains can block ventilation holes. If the monitor is installed in a rack, make certain it has sufficient ventilation.

WARNING: If the monitor's plug does not fit your power outlet, do NOT modify the plug. Have a certified electrician update your power outlet. Do NOT route the power cord where individuals can trip on it. Do NOT route the power cord where it can be damaged such as under a rug.

Place the monitor on a flat sturdy surface near a power outlet. Connect the video input cable to the *Video In* BNC connector. The video input can be from a camera, VCR, multiplexer or the loop output of another monitor.

Make certain the *Scan Mode Selector* is set to the correct standard for your area. (EIA for most of North America and CCIR for most of Europe.)

Figure 4 – Single monitor connection

If you plan to loop the video out to another monitor, connect a cable to the *Video Out* BNC and route it to the *Video In* of the second monitor. Up to three monitors can be connected using the loop-through feature.

Figure 5 – Multiple monitor connection

Connect the power cord to the power outlet.

Chapter 3 – Operation

To turn on the monitor, press the power button on the front panel. After a few seconds, video should appear on the monitor. If video does not appear, refer to the *Troubleshooting* section of this manual.

If the picture is skewed, adjust the *H-HOLD* (horizontal hold) by rotating the knob clockwise or counterclockwise until the picture is stationary.

If the picture rolls, adjust the *V-HOLD* (vertical hold) by rotating the knob clockwise or counterclockwise until the picture is steady.

If the picture is too dark, rotate the *BRIGHT* knob clockwise to brighten it. If the picture is too bright, rotate the *BRIGHT* knob counterclockwise to darken it.

Rotate the *CONTRAST* knob clockwise to increase picture contrast and counterclockwise to decrease contrast.

Appendix A – Troubleshooting

Problem	Possible Solution
No Video	<p>Check that all components in the system (monitor, cameras, VCRs, multiplexers, etc.) have power and are turned on.</p> <p>Check that the camera lens cap is removed and the lens is set to proper aperture.</p> <p>Check coaxial cable(s) for proper connections and condition.</p> <p>Make certain the <i>BRIGHT</i> or <i>CONTRAST</i> control knobs are not turned to their extreme positions.</p> <p>Connect a known good video source directly to the monitor to make certain the monitor is not the problem.</p>
Bad Video	<p>If no video equipment is “looped through” the monitor, make certain that a cable is NOT connected to the loop-through connector.</p> <p>Make certain the <i>SCANMODE</i> selector switch is set to the correct standard. EIA is used in most of North America. CCIR is used in most of Europe.</p>
Video too bright or dark	<p>Adjust the <i>BRIGHT</i> knob.</p> <p>Check that the lens aperture is set correctly</p>
Bad video contrast	Adjust the <i>CONTRAST</i> knob.
Skewed picture	Adjust the <i>H-HOLD</i> knob.
Rolling picture	Adjust the <i>V-HOLD</i> knob.

Problem	Possible Solution
Fuzzy Video	<p>If the camera has a manual focus lens, check that it is properly focused.</p> <p>If the camera has an autofocus lens, ensure that it is working properly.</p> <p>Check that the back focus ring on the camera has been adjusted correctly.</p> <p>Check that the lens and housing window are clean.</p>

Appendix B – Specifications

PICTURE TUBE	12" Diagonal, 90° Deflection Angle
(Useable screen size)	(11.6")
POWER SOURCE	90 to 264 VAC, 50Hz/60Hz
POWER CONSUMPTION	18 Watts
VIDEO STANDARD	EIA and CCIR
RESOLUTION	more than 800 TV lines (center)
INPUT SIGNAL	1.0 Volt peak-to-peak (75 ohms)
SCANNING FREQUENCY:	
HORIZONTAL	60Hz: 15.734KHz
.....	50Hz: 15.625KHz
VERTICAL	60Hz: 59.94Hz
.....	50Hz: 50Hz
LINEARITY:	
HORIZONTAL	10% Maximum
VERTICAL	10% Maximum
ACTIVE DISPLAY AREA:	
HORIZONTAL:	10% overscanning
VERTICAL:	13% overscanning
VIDEO INPUT	BNC connector
CONTROLS:	
FRONT	H-HOLD
.....	V-HOLD
.....	BRIGHT
.....	CONTRAST
.....	POWER Switch
BACK	V-LINEARITY
.....	V-HEIGHT
.....	EIA/CCIR Selector Switch
OPERATING TEMPERATURE	32°F to 104°F (0°C to 40°C)
AMBIENT HUMIDITY	0% to 90%
DIMENSIONS (W x H x D)	12" x 11 1/4" x 12 1/8"
.....	305mm x 286mm x 308mm
WEIGHT	16 lbs. (7.3 Kg)
SHIPPING WEIGHT	19 lbs., 9 oz. (8.9 Kg)
